Professional Experience

Project Manager 2 *Pike Engineering – Dallas, TX*

Aug. 2026 – Present

- Lead and mentor Project Manager I team members, providing guidance on project execution, workload prioritization, and operational best practices to drive successful project delivery and team performance.
- Oversee project financials, including bid development, budgeting, forecasting, resource planning, and profitability tracking, ensuring projects align with operational and financial objectives.
- Partner with internal and external stakeholders to coordinate project setup, job assignments, risk mitigation, and workflow prioritization while serving as a key point of communication throughout the project lifecycle.
- Maintain executive dashboards and KPI reporting while leveraging operational and financial data to forecast workload demand, optimize resource utilization, monitor portfolio performance, and identify process improvement opportunities that enhance productivity, service delivery, and business results.

Project Manager 1 *Pike Engineering – Dallas, TX*

Jan. 2026 – July 2026

- Managed 300+ concurrent utility infrastructure projects valued at \$1M-\$3M, coordinating cross-functional teams across surveying, permitting, and engineering to ensure on-time delivery, regulatory compliance, and successful project execution from initiation through closeout.
- Developed and maintained executive dashboards, KPI reports, and data visualizations to analyze operational performance and provide visibility into productivity and workflow efficiency across multiple business functions.
- Partnered with cross-functional leaders to define reporting requirements, establish key performance metrics, and translate business needs into actionable insights and data-driven visualizations.
- Transformed large operational datasets into executive-level reports and presentations, delivering insights to senior leadership, including the Vice President, to support strategic planning, process improvement, and performance management.

Data Engineer Intern *UTHealth Houston School of Dentistry – Houston, TX*

Jan. 2025 – Aug. 2025

- Design and develop Power BI dashboards for the UTHealth Houston School of Dentistry's Texas Center for Oral Healthcare Quality and Safety to assess documentation completeness and compliance with quality-of-care metrics using EHR data, supporting quality assurance initiatives.

PT/OT Technician *Houston Methodist Hospital – Houston, TX*

May 2022 – Sept. 2024

- Extracted and analyzed EHR data to track patient scheduling, visit completion, and unassigned cases for daily PT/OT production reports, supporting data-driven decision-making and enhancing operational efficiency within the department.

Education

M.S. Biomedical Informatics: Health Data Science and Artificial Intelligence

University of Texas Health Science Center at Houston – Houston, TX

B.S. Exercise Science & Pre-Health Professions

Creighton University – Omaha, NE

Technical Skills

- **BI & Visualization:** Power BI, Tableau, Excel (Pivot Tables, VLOOKUP)
- **Programming:** Python, SQL, R/R Studio, Java
- **Data Tools:** Pandas, PySpark, MongoDB, Salesforce (CRM Reporting, Data Entry, Dashboards)
- **Analytics:** Data Analysis, KPI Reporting, Dashboard Development, Data Visualization
- **Process Improvement:** Project Management, Process Mapping, LucidChart, Swimlane & Yourdon Diagrams

Certifications

Microsoft Data Visualization Professional Certificate *Coursera*

Data Acquisition Management *CITI Program*

LinkedIn Learning: Python Essential Training, Python Data Structures and Algorithms, Python: Recursion, Programming Foundations: Fundamentals, Pandas Essential Training, Power BI Data Methods, Learning Power BI Desktop, Creating Interactive Tableau Dashboards, Hands-On Introduction: Java, AI-Drive Project Manager, Introducing Jupyter, Learning Data Analytics, SQL for Data Analysis, SQL: Data Reporting & Analysis
